

A Warm Welcome to the Academic Year 2083

On behalf of The Velocity School family, I extend my heartfelt greetings and best wishes to all our respected parents and guardians as we begin another promising academic year.

We sincerely thank you for your continued trust, cooperation and support. Your partnership plays a vital role in shaping a positive and enriching learning environment for our students.

As we step into the academic session 2083, we look forward to another year filled with growth, learning and meaningful achievements. Together, let us continue nurturing our children to become confident, responsible and compassionate individuals.

Strengthening Our Learning Approach

We are pleased to continue and strengthen our successful collaborations that enhance both academic and holistic learning:

- Our partnership with **Mero Coding Class**, in association with Coding with Kids, USA, to build strong digital skills among our students. The program also extends into **robotics learning**, helping students apply coding knowledge in building and understanding real-world automated systems.
- Our collaboration with **Karkhana** promotes hands-on, experiential learning in Science.
- The **CPS and CPRS program** in collaboration with Lawanya International continues to support structured and impactful learning, especially in early and primary grades.
- The **Veda App** strengthens communication between school and parents, ensuring timely updates and better engagement.
- Our collaboration with **Midas Education** enriches classroom learning through curriculum-aligned digital resources to make concepts engaging and easier to understand.

We remain committed to our philosophy of “Learning by Doing,” ensuring that students actively engage in their learning journey.

What's New This Year

To further enrich our students' overall development, we are excited to introduce the **PlayFit** Program, a dedicated extracurricular initiative focused on promoting a healthy body and active lifestyle, along with **Social Emotional Learning (SEL)** classes from **Vaav**, designed to support students' emotional well-being, self-awareness, empathy and interpersonal skills, helping them grow into balanced and confident individuals.

Assessment Initiatives

This year, we will follow a comprehensive assessment structure consisting of four assessments, including continuous assessments conducted between terms. This approach ensures regular monitoring of student progress while encouraging consistent learning and improvement.

Our Commitment

With our continued partnerships and new initiatives, we aim to nurture students who are confident, resilient and future-ready. Our approach is rooted in STEAM-centric education, integrating Science, Technology, Engineering, Arts and Mathematics to promote creativity, critical thinking and problem-solving skills. We remain committed to balancing academic excellence with physical, emotional and social development, ensuring a holistic learning experience for every child.

In Conclusion

We extend our sincere gratitude to all parents and guardians for being an integral part of The Velocity School community. Your unwavering support strengthens our efforts and inspires us to do better every day.

Let us continue to work hand in hand to make the academic year 2083 a joyful, meaningful and successful journey for our children.

Thank you for your continued trust and collaboration.

Warm regards,

Rekha Khanal

Founder Principal
